Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 20-23, drawn to an article formed into a film, classified in class 426, subclass 138.
- II. Claims 11-19, drawn to a method of making the film, classified in class 426, subclass 512.

The inventions are distinct, each from the other because:

Inventions I and II are related as a product and method of making the product. The product as recited in Group I can be made by methods other than that recited in Group II. For example, the article does not require an extrusion step. The article can be made without extrusion, for example, by plate casting; that is, pouring the composition onto a plate with raised borders and allowing the composition to harden.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
